

Compensation Framework 2026

Sao Mai Technology JSC · People & Culture · RESTRICTED

Restricted document. Access is limited to the People & Culture team and the Leadership team. It must not be circulated to staff, shared with clients, or published on any internal site. Individual salary figures are never disclosed to anyone outside this group.

This framework sets the salary bands, bonus multipliers and promotion criteria that apply to all Sao Mai Technology employees in Vietnam for the 2026 calendar year. It is reviewed each September against the published Vietnam technology salary survey.

1. Levels and monthly salary bands

All figures are gross monthly salary in VND, before social insurance and personal income tax.

L1 Associate Engineer	18,000,000 to 26,000,000
L2 Engineer	27,000,000 to 42,000,000
L3 Senior Engineer	45,000,000 to 62,000,000
L4 Lead Engineer	63,000,000 to 85,000,000
L5 Principal Engineer	88,000,000 to 120,000,000
L6 Engineering Director	125,000,000 and above, set individually by the CEO

Business support roles map to the same six levels with bands set at 82% of the engineering band for the equivalent level.

2. Tet performance bonus multipliers

The Tet performance bonus is a multiple of one month's basic salary. The multiplier depends on the annual performance rating and the employee's level. It is decided in December and paid separately from the 13th month salary.

Outstanding	1.5 at all levels
Exceeds expectations	1.2 at L1 to L3, and 1.35 at L4 and above
Meets expectations	0.9 at all levels
Below expectations	No bonus. A performance improvement plan is opened in January.

Worked example. A **Level 3 Senior Engineer** rated **Exceeds expectations** receives a Tet bonus of **1.2 times** one month's basic salary. At L4 the same rating would give 1.35.

3. Promotion criteria

Minimum time in level	L1 to L2: 12 months. L2 to L3: 18 months. L3 to L4: 24 months. L4 to L5: 36 months.
Evidence required	Two consecutive ratings of Exceeds expectations or higher, plus a written case from the line manager.
Decision points	Promotions are confirmed at the March and September review cycles only.
Salary on promotion	The employee moves to at least the midpoint of the new band, or receives a 12% increase, whichever is greater.

4. Market adjustment and off-cycle changes

- Bands are re-benchmarked every **September**. Where the market has moved by more than **8%** for a level, the band is adjusted for the following January.
- Off-cycle increases require **CEO approval** and are limited to retention cases with a documented competing offer.
- No employee may be paid below the floor of their level's band. Where a band moves above an existing salary, the salary is raised to the new floor at the next payroll run.

5. Senior hire referral bonus

The standard referral bonus of 15,000,000 VND set out in the Employee Handbook is increased for senior hires:

L4 and L5 hires	25,000,000 VND
L6 hires	40,000,000 VND
Payment schedule	50% on the new joiner's start date, 50% after 6 months of service, as for the standard bonus.

Questions about this framework go to the Head of People & Culture. Do not forward this document. Next review: September 2026.
